We provide an evaluation of all your energy consumption equipment, energy layout and energy use on site and a detailed report to reduce your energy cost. This report includes recommendations for energy reduce and an ROI for the investment of energy friendly equipment.

Go Green Ltd. will credit the cost of the EEA on any Investment within 1 year after the Audit, up to the full costs of the report.

What to Expect With Your Energy Audit

Your Commercial Energy Audit will consist of the following four steps:

1. Perform historic energy use analysis prior to the site visit to determine base vs. seasonal usage.
2. Perform a full facility inspection of all energy consuming items including HVAC, machinery, lighting, water, electronics, and lots more.
3. Identify potential modifications that will reduce your energy use and/or operating cost.

4. Prepare a report that documents the analysis and results.

In order to provide you the maximum in energy savings, the energy auditor will need to obtain the energy bills for a minimum of 1 year.

Your energy efficiency audit is a non-invasive procedure that you can have done during normal business hours.
